EDUCATION

Yale University

Bachelor of Science in Electrical Engineering and Computer Science

New Haven, CT

Expected May 2028

- **Coursework:** Data Structures & Algorithms, Machine Learning, Computer Architecture, Full Stack Development, Linear Algebra, Discrete Math, Communications & Control, Humanities Data Analysis, Product Management Foundations, Microeconomics, Physics I & II, Computer Aided Design
- **Awards:** 1st Place, Yale AI x SpaceXAI Cursor Build Challenge; Seidman Scholar; Sanchez de Casellas Scholar

EXPERIENCE

SynovAI, Inc.

AI Engineering Intern

May 2026 – Aug 2026

Glastonbury, CT

- Built an automated Python pipeline (BeautifulSoup, RDKit) that mined and validated **400+** single-step reaction routes from **~520** Organic Syntheses procedures, converting chemical names to molecular structures at **~98%** validity for ML training data
- Designed a multi-stage validation system (atom-balance checks, reactant selection, functional-group coverage) that removed **100+** inconsistent routes and cut structurally flagged entries by **~40%**, producing an audited, training-ready dataset
- Authored a licensing audit and data quality docs that surfaced extraction blockers across sources and redirected project scope

Now Boarding Digital

Research Consultant Intern

May 2025 – Jul 2025

Cape Town, South Africa

- Led AI and UX research across **5** sectors (EdTech, FinTech, HealthTech, InsurTech, Marketplace) on a **6**-person consulting team
- Analyzed AI adoption patterns across **10+** products (Khanmigo, Lemonade, Etsy, Upstart) and translated them into **3** design recommendations centered on transparency, personalization, and trust

PROJECTS

Better Office Hours | *1st Place, Cursor Build Challenge* | *Next.js, TypeScript, NextAuth, ElevenLabs, xAI*

[GitHub](#)

- Co-built (team of 2) a real-time voice tutor that knows a student's course, reads their uploaded notes, and talks them to the answer with hints and a live whiteboard instead of giving solutions
- Built the course-context layer: chunking and lexical ranking of Canvas materials with page attribution, behind a solution-safe retrieval boundary that keeps posted solutions out of student-facing answers
- Built Yale Google sign-in (NextAuth OAuth with a yale.edu email policy) and a session recap card that validates model output and rejects answer disclosure, each covered by automated check scripts

Contest | *Next.js 16, TypeScript, Prisma, PostgreSQL, Tailwind CSS, Vercel*

[Live](#)

- Built a paid-entry poetry competition with a live prize pool, an 80/20 fee split in integer cents, and anonymous entries
- Implemented hybrid winner selection (**40%** community vote, **60%** judge scores across 4 criteria) with role-based admin, judge, and creator flows and JWT session auth

Tenge (Solo Developer) | *React, TypeScript, Vite, Zustand, Supabase, Vercel*

[Live](#)

- Built an inventory and POS app for small clothing retailers after research with **3** shop owners: FIFO batch tracking, price rollover, and negotiable pricing
- Shipped in typed React and TypeScript with Zustand state; integrating Supabase auth, Row Level Security, and cloud sync

BiKu (Co-Founder) | *Next.js, TypeScript, Firebase, Node.js, Tailwind CSS*

[bikuliving.com](#)

- Co-founded a Yale housing, subletting, and roommate-matching platform; shipped auth and onboarding; **6** beta users
- Built a feedback pipeline (Next.js API route, Nodemailer) and site pages through PRs gated on test, lint, and build checks

Loko (Co-Founder, Growth) | *WhatsApp AI agent, mobile and web app*

[lokoglobal.org](#)

- Lead growth for a WhatsApp-first AI agent and mobile/web app for rides, food delivery, and a marketplace in Zimbabwe
- Pilot reached **977** live listings from **174** sellers ingested from WhatsApp groups, **~470** users, and **27** paid rides

LEADERSHIP

Yale Dzana Dance | *President*

Sep 2025 – Present

- Lead **30+** members; create and teach original choreography, run auditions and rehearsals, and coordinate campus performances

ColorStack at Yale | *Communications Chair*

Jan 2025 – Present

- Run communications for Black and Latinx CS students: Substack newsletter, flyers, and event posts

Yale University, Berkeley College | *Chief Aide*

Jan 2025 – Present

- Lead a team of **20** aides through shift coordination and staff training; run **5+** college events per semester

TECHNICAL SKILLS

Languages: Python, C, C++, Java, TypeScript, JavaScript, SQL, HTML/CSS, Racket, MATLAB, Verilog

Frameworks: React, React Native, Next.js, Node.js, Express.js, Tailwind CSS, Zustand, Prisma, NextAuth

Data, Cloud & Tools: PostgreSQL, MongoDB, Supabase, Firebase, AWS, Vercel, Render, Git, RDKit, BeautifulSoup, SolidWorks

Other: Agentic AI systems, RAG, LLM APIs | **Interests:** Dance, Poker, Video Editing, Soccer, Entrepreneurship
